EXECUTIVE SUMMARY

Helora Dynamics Resources Sdn. Bhd. proposes the placement of family-friendly vending machines within designated hospital areas to provide convenient access to:

- Soft plush toys (unisex)
- Small children's toys (e.g. toy cars)
- Baby gift hampers (newborn essentials, unisex)
- Gift hampers (adult)

These machines are designed specifically for hospital environments and:

- Require zero capital expenditure from the hospital
- Operate on cashless payment (QR, card T&G, DuitNow, GrabPay, BoostPay)
- Are fully maintained by Helora
- Do not involve hospital staff in operations

The objective is to enhance the patient and family experience and happiness, particularly at lobby, paediatric, and maternity areas.

About Helora

Company Registration No.: 202501046136 (1647533-T)

A. Company Overview

Helora Dynamics Resources (M) Sdn. Bhd. is a company incorporated in Malaysia providing structured, compliance-oriented vending solutions designed specifically for healthcare institutions.

B. Corporate Information

- Anti-tilt structure
- Child-safe dispensing bin
- Cashless payment (QR, credit/debit card, major Malaysian e-wallets)
- Low operational noise
- Standard commercial-grade electrical components
- Internal circuit protection system

Designed for safe and stable operation within healthcare premises.

C. Power Requirement:

Standard 13A power point

D. Dimensions & Physical Specifications:

Approx.
Height: 1933mm
Width: 1080mm
Depth: 320mm
Weight: 150kg

Proposed Placement Areas

A. Placement Principles

The vending unit will be positioned in publicly accessible areas that do not interfere with medical operations, emergency pathways, or patient care workflows.

Placement will prioritise:

- Clear visibility without obstructing circulation
- Proximity to visitor traffic zones
- Low-noise compatibility with indoor environments
- Compliance with hospital safety and facilities requirements

Final placement is subject to hospital approval.

B. Suggested Locations

- **Paediatric Waiting Areas**
  Aligned with child-friendly product categories such as plush tous and small gift items. Provides comfort options for young patients and accompanying family members.

- **Main Lobby**
  High visitor visibility and convenient access for gifting purchases without entering restricted clinical zones.

- **Family Waiting Lounges**
  Serves relatives and caregivers during inpatient visits. Positioned to support visitor convenience while maintaining corridor clearance.

- **Near Maternity Wards (Non-Clinical Zone)**
  Suitable for newborn gift hampers and family-oriented items. Placement will avoid obstructing ward access or staff workflow.

Operational Model

A. Installation & Setup

Helora will supply and install the vending unit at no cost to the hospital.

- Pre-activation inspection
- Standard 12A electrical connection
- Placement confirmation with facilities department
- Freestanding, non-permanent installation

B. Inventory Management

Helora will manage all inventory operations.

- Scheduled replenishment visits
- Stock level monitoring
- Removal of unsold or damaged items
- Product categories aligned with hospital-approved framework

C. Maintenance & Technical Support

Helora will ensure continuous operational readiness.

- Preventive maintenance checks
- Internal component inspection
- Cleaning and hygiene inspection
- Technical fault rectification

Response Time Commitment:
Within 3-24 hours

D. Customer Service Handling

- Service contact number displayed on machine
- Direct handling of refund
- No involvement required from hospital staff

E. Operational Responsibility & Risk Control

Helora retains full operational responsibility for the vending unit.

- No structural modification required
- Compliance with internal facilities guidelines

Trial Period

Helora proposes an initial three (3) month pilot placement to evaluate operational suitability within the hospital environment.

A. Objectives of Trial Deployment

- Assess visitor demand and usage patterns
- Evaluate operational compatibility with hospital facitilies
- Optimise product mix based on observed purchasing behaviour

B. Trial Framework

- No installation cost to hospital
- Full operational responsibility retained by Helora
- Performance monitoring throughout trial period
- End-of-period review with hospital management

Value to Hospital

A. Enhanced Patient & Family Experience

The vending unit provides convenient access to comfort and gifting items for patients and accompanying family members, reducing the need to leave hospital premises for basic retail needs.

B. Convenient Access to Gifts & Essentials

- Immediate access to curated, non-perishable items
- Suitable for quick purchases during visiting hours
- Designed for hospital-friendly product categories

C. Alignment with Paediatric & Maternity Environments

Product categories are structured to support:

- Paediatric waiting areas
- Family visitor zones
- Maternity-adjacent non-clinical areas

D. Modern, Clean & Controlled Retail Format

- Fully cashless system
- Enclosed locker-based dispensing
- Low operational noise
- Managed replenishment and hygiene checks

Designed to integrate seamlessly within indoor healthcare settings.

E. Zero Operational Risk to Hospital

- No Capital expenditure required
- No manpower allocation
- No stock handling
- Full operational responsibility retained by Helora
- Trial-based deployment model
